

# R3DOnline®

## R3D Suite

The innovative platform that allows you to easily and accurately manage your company procedures. **R3D Suite** is able to use full multimedia content, including virtual and augmented reality, to support assembling and personnel training.

### CREATE

#### MANAGE AT BEST YOUR PROCEDURES

Design your processes visually refining them to the level of detail you need. Add images, multimedia, virtual reality and augmented reality to show the operation steps.

### ARCHIVE & PRINT

#### CONSOLIDATE THE COMPANY ASSETS BASED ON YOUR PROCEDURES

Create and manage the repository where you can concentrate the wealth of company procedures making them available on paper too.

### MODIFY

#### INCREASE CONTINUOUSLY THE QUALITY OF THE PROCEDURES

Finely adjust every detail from real world experience and quickly create new procedures from the existing ones.

### DISTRIBUTE

#### USE THE PROCEDURES IMMEDIATELY, AND MAKE THEM ACTIONABLE

Your procedures are immediately ready for distribution on any platforms available without further technical processing.

### EXECUTE

#### MAKE YOUR PROCEDURES ENGAGING

The procedures created with the **R3D Suite** are optimized for use in a real assembly and maintenance environment using **augmented** and **virtual reality** features easily activated and providing a fully immersive experience.

### TRAIN

#### ENRICH YOUR TRAINING CENTER WITH DEDICATED SOLUTIONS

Train your staff in controlled and repeatable conditions using the same procedures in place in assembly and maintenance.

### RECOGNIZE

#### SMART RECOGNITION

The system is able to recognize images, markers and objects in the operating area to trigger the right Augmented Reality content.

### INTEGRATE

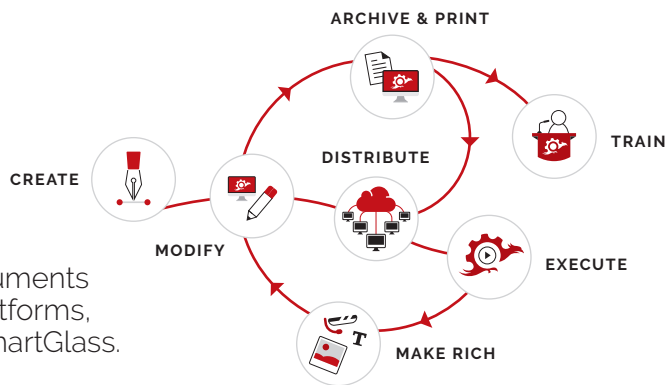

#### INTEGRATE YOUR PROCEDURES WITH THE ACTUAL CONTEXT OF YOUR COMPANY

Make your procedures aware of the environment in which they are carried out integrating them with the available sensors. Integrate the platforms used to execute the procedures with software modules in the company's ecosystem exchanging data with them.

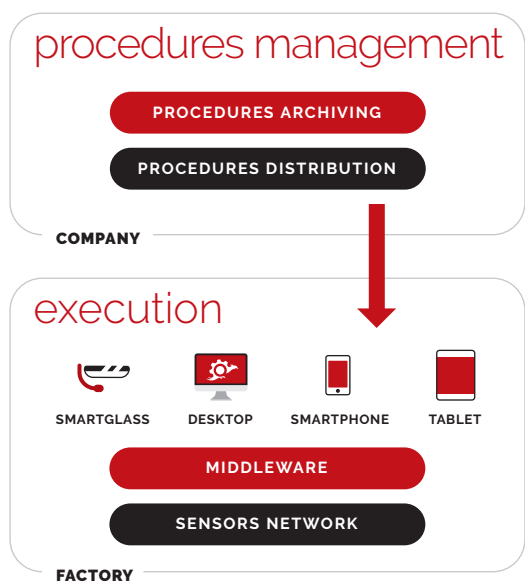

**THE PRECISION AND THE FLEXIBILITY YOU NEED TO REDUCE COSTS**

# R3D Flow

Design, edit and export procedures together with your photos, videos, documents and **3D models**. Deploy them on all platforms, including Smartphones, Tablets and SmartGlass.

- ▶ visual procedures "drag and drop"
- ▶ great accuracy, featuring a high level of detail
- ▶ adaptable to any context
- ▶ it uses multimedia content, including 2D/3D
- ▶ automatically manage your procedures
- ▶ smart changes
- ▶ compatible with all the devices
- ▶ import and edit your previous procedures
- ▶ make uniform the new and the old procedures
- ▶ creates and manages dedicated libraries
- ▶ group your procedures to manage the mas company asset
- ▶ export the procedures in monolithic, versioned, all-inclusive bundles
- ▶ ability to read sensors provides a flexible execution context responding to environmental conditions

**VERSATILITY, QUALITY AND OPTIMIZATION**

# R3D View

build your procedures using **Virtual Reality** and **Augmented Reality**

- choose the level of support you wish: Virtual Reality, augmented or other media 
- easy, procedures are guided step by step 
- adaptable, taking full advantage of the specific device used 
- able to use the readings from a sensor network 
- notify and inform your staff everywhere 
- integrates seamlessly with your corporate network
